

WHO ARE WE

Advanced Solar Solutions Energy Company, designs and installs the highest performing solar energy systems in the industry. They range in size from 1 kilowatt to over 1 megawatt, and power businesses, government and agricultural facilities, and homes.

Our team has extensive experience and a passion for the business. We closely link modeling, building, and monitoring to provide solar solutions with the highest return on investment. We have built solid relationships with the top vendors in the industry, which enables us to get the solar panels and materials needed to build systems on schedule. Our premier in-house design and installation teams deliver carefree, turnkey solar systems to our customers, who love our world-class customer care. Most important, we stand behind every system 100%.

ENERGY PRODUCTS FOR FIT COMPLIANCE

- ✓ Photovoltaic panels of various sizes as well as kit systems. These products can be applied to any project as well as marine or RV applications.
- ✓ Inverters, charge controllers and numerous other products related to the above from North American manufacturers that are UL/CSA approved.
- ✓ Metering and system monitoring equipment as well as software driven logging or web based tracking.
- ✓ Racking systems for mounting panels and equipment of various configurations
- ✓ Solar Hot-Air systems from wall mounted units to steel cladding for large buildings.
- ✓ Solar Hot-Water panels and heat exchangers for domestic hot-water applications
- ✓ Solar pool and salt water systems for residential and commercial applications
- ✓ Skystream & Windtronic Wind turbines and 33, 45 & 60 foot Monopole towers.
- ✓ CFL and LED lighting products for Residential, Commercial and Industrial applications.
- ✓ Power Factor and Lighting System design.

SERVICES AND MAINTENANCE

We provide a range of maintenance services to ensure each piece of your solar system is functioning properly, allowing for maximum energy output.

- Preventative Maintenance and Inspections— Advanced Solar Solutions industry-leading 21-Point Inspection and Maintenance Program enables our technicians to proactively identify and fix potential problems before they occur.
- Corrective Maintenance— Advanced Solar Solutions technicians have the expertise and equipment to perform the necessary corrective action to rapidly restore a system to service.
